e- Payment

RFID Tracking

Waste Management

- We provide customized services & solutions as per client's requirement .

Why Fiber Optic Cable Network for Smart Industry ?

- Optical Fiber has expandable Unlimited Bandwidth capacity.
- OFC carries high-bandwidth signal at long distance using light waves.
- It is scalable and reliable for future upgradation and additional bandwidth demands.
- Fiber is strong medium with capability of transferring petabytes of data. We use this capability for supporting advance applications and services like: **CCTV Surveillance, High Speed Internet, Multipoint connectivity, Wi-Fi Hotspot, Live Streaming, Smart Street Light** and so on.
- It is inevitable to use OFC backbone against traditional wired medium, wireless medium for high bandwidth intensive applications.
- These salient features converges OFC backbone to be **"Future-Proof"**.
- OFC network have higher and long-term durable network life.
- Technological growth and communication of the globe is dependent on OFC infrastructure.

Why R.K. Infratel for Smart Industry Solutions ?

- Strong UG OFC Network with planning, installing and maintenance services.
- All active and passive solutions under one roof.
- Professional and highly skilled team with long term experience in executing similar kind of projects.
- State of the art equipments and technology.
- Industry standard processes and policies.
